apa 6th edition book reference

Published: September 19, 2026 | Index ID: #-

Introduction

When writing academic papers, researchers, students, and professionals often turn to the American Psychological Association (APA) style as the go-to format for citations and references. Among its many editions, the sixth edition—commonly referred to as APA 6th edition—remains widely used in psychology, education, and social sciences, even as newer editions are released. Mastering the art of referencing books in APA 6th edition is essential for maintaining credibility, avoiding plagiarism, and ensuring your work aligns with scholarly standards.

This guide offers a thorough, step by step walk through every aspect of book citation in APA 6th edition. From the basic structure of a reference entry to nuanced rules for multi author works, electronic editions, and special cases, you'll gain the confidence to create flawless citations that meet the expectations of professors, editors, and peers.

Why APA 6th Edition Still Matters

Although APA 7th edition has been out since 2019, many institutions and journals continue to require APA 6th edition. Reasons include:

- Legacy Materials: A vast amount of literature, syllabi, and reference guides still adhere to the sixth edition's conventions.
- Institutional Policy: Some universities and publishers have not yet updated their style guidelines.
- Consistency: For longitudinal research projects that began under the sixth edition, maintaining consistency avoids confusion.

Because of this continued relevance, understanding APA 6th edition's book reference format remains a critical skill.

Core Principles of APA 6th Edition

Before diving into the specifics of book references, it's useful to recap the foundational principles that govern APA style:

1. Author–Date System: Citations are organized by author name and publication year.
2. Alphabetical Order: Reference lists are alphabetized by the first author's last name.
3. Hanging Indent: Each entry has a hanging indent—first line flush left, subsequent lines indented.
4. Double Spacing: The reference list is double spaced, though the HTML format here uses normal line breaks for readability.
5. Clarity and Precision: Every element of a citation must be accurate to aid readers in locating the source.

General Format for Book References

In APA 6th edition, a book reference follows this basic structure:

Author, A. A. (Year). Title of the book: Subtitle if applicable. Publisher.

Key points:

- Authors: List up to 20 authors. Use an ampersand (&) before the final author.

- Year: Enclosed in parentheses, followed by a period.
- Title: Italicized; only the first word and proper nouns are capitalized.
- Publisher: The name of the publishing company; do not include terms like “Inc.” or “Ltd.” unless part of the official name.

Example of a Basic Book Reference

Smith, J. K. (2015). Understanding human behavior. Academic Press.

Step by Step Guide to Citing Books

1. Identify All Authors

Collect the full names of all contributors. If the book has a single author, list that name. For multiple authors:

1. Write the last name, followed by a comma and the initials.
2. Separate each author with a comma.
3. Use an ampersand (&) before the last author.

Example: *Doe, J. R., & Lee, A. B.*

2. Note the Publication Year

The year of publication appears immediately after the author names, inside parentheses, and ends with a period.

Example: *(2020).*

3. Write the Book Title

Italicize the title and subtitle (if any). Capitalize only the first word of the title, the first word after a colon or dash, and any proper nouns. Do not use quotation marks.

Example: *Exploring cognitive development: A comprehensive guide.*

4. Add the Edition (if not the first)

Include the edition number in parentheses after the title, preceded by a space. Use Roman numerals.

Example: *Exploring cognitive development: A comprehensive guide (3rd ed.).*

5. Provide the Publisher

List the name of the publishing company. Do not add “Inc.”, “Ltd.”, or other corporate designations unless they are part of the official name.

Example: *Oxford University Press.*

6. Combine All Elements

Place each component in the correct order, separated by punctuation as shown in the earlier examples.

Special Cases and Common Variations

1. Multiple Authors (Up to 20)

APA 6th edition allows listing up to 20 authors. If a book has 21 or more authors, list the first 19, add an ellipsis, then add the final author’s name.

Example: *Johnson, L. M., Smith, T. R., ... & Brown, P. Q.*

2. Edited Books

For edited volumes, include the editor's name(s) followed by the abbreviation "(Ed.)" or "(Eds.)" in parentheses after the title.

Example:

Jones, A. B., & Patel, R. (Eds.). (2018). Advances in educational psychology. Cambridge University Press.

3. Chapter or Article in an Edited Book

When citing a specific chapter, list the chapter author(s), the year, the chapter title (not italicized), "In" followed by the editor(s) and the book title (italicized). End with the page range.

Example:

Lee, C. D. (2019). Cognitive biases in decision making. In J. K. Smith (Ed.), Handbook of cognitive psychology (pp. 45–67). Routledge.

4. Translated Books

Include the translator's name after the original author's name, preceded by "(Trans.)". Add the original publication year in brackets, followed by the translated year.

Example:

Garcia, M. (2014). El arte de la vida (M. Lopez, Trans.). (Original work published 2009). Editorial Nueva.

5. Books with No Author

When no author is listed, start the entry with the title. Move the title to the author position and follow with the year.

Example:

Understanding the mind. (2017). Mindful Insights. Sage Publications.

6. Corporate Authors

Use the full corporate name as the author. Do not abbreviate unless the abbreviation is commonly used and recognized.

Example:

American Psychological Association. (2010). Publication manual of the American Psychological Association (6th ed.).

7. Books with a DOI or URL

While DOI or URL are typically reserved for journal articles, some books—particularly e books—include them. Place the DOI or URL after the publisher, preceded by "Retrieved from" if no DOI is available.

Example (DOI):

Brown, T. R. (2016). Digital transformations in education. Springer. https://doi.org/10.1007/978-3-319-12345-6

Example (URL):

Wilson, G. (2018). Learning strategies for online courses. Wiley. Retrieved from https://www.wiley.com/en-us/learning-strategies-online-978111-12345

In Text Citations for Books

APA 6th edition uses the author–date system. For a single author, include the last name and year. If you quote directly, add a page number.

Examples:

- (Smith, 2015) – paraphrase
- (Smith, 2015, p. 23) – direct quote
- (Smith & Lee, 2020) – two authors
- (Smith, Johnson, & Lee, 2021) – three authors
- (Smith et al., 2022) – three or more authors

When the author''s name is part of the narrative, omit it from parentheses.

Example:

Smith (2015) argues that...

Common Mistakes and How to Avoid Them

1. Missing Publisher: Always include the publisher’s name. If it’s unknown, use “n.p.” (no publisher).
2. Incorrect Capitalization: Remember APA capitalization rules—only the first word and proper nouns.
3. Omitting Edition: If the book is not first edition, include the edition number; otherwise, omit it.
4. Wrong Order: Keep the order: Author(s), year, title, edition, publisher.
5. Using Quotation Marks: Do not use quotation marks for titles.
6. Forgetting the Italics: Titles of books must be italicized.
7. Inconsistent Indentation: Use a hanging indent; in HTML, this is naturally handled by the browser.
