ark survival evolved cheats cheat codes hints tips

Published: September 19, 2026 | Index ID: #-

Introduction

Ark: Survival Evolved has taken the world by storm, inviting players to brave a prehistoric island teeming with dinosaurs, ancient ruins, and endless possibilities. Whether you're a seasoned survivor or a newcomer still learning the ropes, the temptation to use **ark survival evolved cheats cheat codes hints tips** is ever-present. Cheats can unlock hidden features, grant instant power-ups, or simply add a splash of fun to a game that can otherwise feel grind-heavy. In this guide, we'll walk you through the most popular cheat codes for all platforms, share practical hints and tips for maximizing their benefits, and discuss how to use them responsibly without compromising your gaming experience.

Understanding the Cheat System in Ark

Ark's cheat system is built into the game's console commands, which can be accessed differently depending on your platform. The console allows you to execute a wide range of commands that alter gameplay mechanics, spawn items, or modify the environment. It's essential to understand that while cheats can make the game easier, they can also reduce the sense of accomplishment and ruin the intended survival experience if used excessively.

How to Enable the Console

- PC (Windows/Linux): Press ~ (tilde) or F1 to bring up the console. If it doesn't appear, you may need to enable the console in the game's settings or launch the game with the -console flag.
- Xbox One/Xbox Series X|S: Hold the Menu button, then press Y to open the console.
- PlayStation 4/PlayStation 5: Hold the Options button, then press Square to bring up the console.
- Android/iOS: The console is not available on mobile versions; cheats must be used through a PC or console.

Basic Console Syntax

Most console commands follow this format:

cheat [command] [arguments]\\nFor instance, cheat god grants invincibility, while cheat give [item] [amount] spawns items. Always use the cheat prefix to activate a command. Remember, the console is case-insensitive, but it's a good habit to use lower case to avoid confusion.

Cheat Codes for PC

Here's a curated list of the most frequently requested cheat codes for the PC version of Ark. These commands are designed to help you progress faster, gather resources more efficiently, or simply explore the game's hidden corners.

Core Survival Cheats

- god – Grants invincibility. No damage, no health loss.
- noclip – Allows you to fly and walk through walls.
- fly – Enables free flight mode.
- speed [value] – Adjusts player movement speed. Typical values range from 1 to 10.
- jump [value] – Increases jump height. Values like 1.5 or 2.0 are common.

- resurrect – Revives you instantly if you die.

Resource & Inventory Cheats

- give [item] [amount] – Spawns a specific item in your inventory. Example: cheat give 0 10 gives ten of item ID 0 (Wood).
- giveall – Gives you all items in the game, with a specified amount. Example: cheat giveall 1 gives one of each.
- addxp [amount] – Adds experience points to your character.
- addxp [skill] [amount] – Adds XP to a specific skill. Example: cheat addxp 3 1000 adds 1000 XP to the third skill.
- addxp 0 1000 – Adds 1000 XP to all skills at once.

Dinosaur & Creature Cheats

- summon [species] [quantity] – Spawns a dinosaur. Example: cheat summon 1 1 spawns one T-Rex.
- summonall – Spawns every dinosaur species.
- summon [species] [quantity] [x] [y] [z] – Spawns at a specific location.
- summon [species] [quantity] 0 0 0 – Spawns at the origin point.
- tame [species] – Instantly tames a dinosaur.
- level [species] [level] – Sets a dinosaur's level. Example: cheat level 1 100 levels a T-Rex to 100.

World & Environment Cheats

- weather [value] – Sets the weather. Example: cheat weather 0 for sunny.
- settime [value] – Sets in-game time. 0 = midnight, 12000 = noon.
- settimeofday [value] – Changes day/night cycle.
- setmaptime [value] – Adjusts the map's time of day.
- setmapweather [value] – Changes the weather for the entire map.

Cheat Codes for Console

Console players enjoy a slightly different set of cheat commands. While many PC cheats are available, some are limited or require additional steps on Xbox and PlayStation.

Xbox Cheat Codes

- god – Invincibility.
- noclip – Fly and wall through mode.
- fly – Free flight.
- give [item] [amount] – Item spawner.
- summon [species] [quantity] – Summon dinosaurs.
- settimeofday [value] – Time of day.

PlayStation Cheat Codes

- god – Invincibility.
- noclip – Fly mode.
- fly – Free flight.
- give [item] [amount] – Item spawner.
- summon [species] [quantity] – Summon dinosaurs.
- settime [value] – Adjust time of day.

Cheat Codes for Mobile

The mobile version of Ark: Survival Evolved is more limited when it comes to cheat codes. Most mobile players rely

on third party apps or in game mods, which can be risky. However, you can still use some basic console commands if you're playing on a device that supports a keyboard.

- god – Invincibility.
- noclip – Fly mode.
- fly – Free flight.
- give [item] [amount] – Item spawner.

Cheat Codes for Multiplayer

In multiplayer servers, cheat codes are typically disabled by default to maintain fairness. However, server admins can enable cheats or use admin commands. Below are the common admin commands that can be used on a server with cheats enabled.

Admin Console Commands

- admincheat god – Grants invincibility to the player.
- admincheat noclip – Enables wall through mode.
- admincheat give [item] [amount] – Spawns items.
- admincheat summon [species] [quantity] – Summons dinosaurs.
- admincheat settimeofday [value] – Changes the time of day.
- admincheat setweather [value] – Adjusts weather.

Common Cheat Hints and Tips

Cheats are only as useful as the strategy behind them. Here are some practical hints and tips to help you get the most out of your cheat codes while keeping the game engaging.

1. Use god for Exploration

Invincibility is perfect for exploring dangerous zones like the **Wasteland** or **Ice Caves**without worrying about hostile creatures. Fly over cliffs or navigate treacherous terrain safely.

2. Combine noclip with fly for Speedy Travel

Once you have **noclip** activated, you can combine it with **fly**to zip across the map, bypassing natural obstacles. This is especially useful for scouting new resource nodes.

3. Use give Wisely

Instead of spamming your inventory, use **give** to obtain specific items you need, such as **metal fragments** for crafting, or **food items** to keep your hunger bar full. This saves you from having to gather resources manually.

4. Level Up Strategically with addxp

Instead of grinding, use **addxp** to boost your skill levels. Target the skills you'll use most often, such as **Engineering** for building or **Survival** for gathering.
