What Is the Year of the Horse in Chinese Astrology?

The Chinese zodiac is an ancient system that assigns one of twelve animal signs to each year in a repeating 12 year cycle. These animals—rat, ox, tiger, rabbit, dragon, snake, horse, goat, monkey, rooster, dog, and pig—are believed to influence the personalities, fortunes, and destinies of people born during their respective years. The horse, known as *ma*in Mandarin, is the seventh sign in the cycle. Those born in a year of the horse are often described as energetic, independent, and charismatic, with a natural inclination towards leadership and adventure.

Unlike the Western zodiac, which is based on the position of the sun at a specific date, the Chinese system follows the lunar calendar. Consequently, the year of the horse can start in late January or early February, depending on the lunar new year's timing. The cycle repeats every twelve years, so the horse years include 1974, 1986, 1998, 2010, and 2022, among others.
